  - If possible, please have any fee waivers prepared for the June conference call.

IEEE Industry Engagement Committee Industry Newsletter – Soliciting Article

- The IEC Resources Working Group is planning publication of their second Industry Newsletter in June 2025. The group selected "Certifications & Testing" as the theme for the upcoming June 2025 issue and we are soliciting articles in this publication. The attached includes editorial guidelines outline criteria, content and submission deadlines. Our plans in development for the next issue thus far include:
  - An Editor's Desk article with a link to a brief "what do you want to read" survey we will use to prioritize future content.
  - An "Around The Regions" article focused on Region 9 (guest author R9 Director Jenifer Castillo).
  - A feature article by invited industry expert Mike Violette regarding how possible tariffs could impact product certifications and testing.
- Please offer your thoughts and ideas on additional content in support of our second quarterly issue of the IEEE Industry Newsletter. Note from the attached that the article submission closing date for this issue is May 22, 2025.
