802.16

Roger B. Marks Chair, IEEE 802.16 Working Group r.b.marks@ieee.org 17 January 2013

To: Walter Johnston, Chief, Electromagnetic Compatibility Division, FCC James Miller, Office of Engineering and Technology, FCC Henning Schulzrinne, Chief Technologist, FCC VIA ECFS

David Allan, Co-chair, Broadband Forum End to End Architecture Group Christophe Alter, Broadband Forum Technical Committee Chair

cc: IETF LMAP mailing list
Paul Nikolich, Chair, IEEE 802 Executive Committee

Subj: Progress on IEEE Project P802.16.3 Architecture and Privacy

The IEEE 802.16 Working Group (WG) on Broadband Wireless Access would like to update your groups with a status report, following the WG's Session #83 of 14-17 January, regarding Project P802.16.3 on *Mobile Broadband Network Performance Measurements*. This follows a previous report of 19 November 2012 (IEEE 802.16-12-0680).

The main accomplishment of Session #83 is an update of working document <u>IEEE 802.16-12-0682-01</u> on "[Draft] IEEE 802.16.3 Architecture and Requirements for Mobile Broadband Network Performance Measurements."

We also reviewed a statement from the Broadband Forum <u>IEEE 802.16-12-0703-00</u> and have addressed its request for clarification regarding the role and purpose of public and private functional entities. This update became a major aspect of the revision of <u>IEEE 802.16-12-0682-01</u> (see in particular section 6.2), and we welcome your views on this topic of great importance in the mobile case.

We also welcome your input and we encourage you to provide comments regarding our Architecture and Requirements draft. We draw your attention to the relevant Call for Contributions <u>IEEE 802.16-13-0018</u>. Our next opportunity to respond to formal communication will occur at <u>IEEE 802.16 Session #84</u> (18-21 March 2013 in Orlando, FL, USA). For information on our future meetings schedules, see http://ieee802.org/16/calendar.html.

Sincerely,

Roger B. Marks Chair, IEEE 802.16 Working Group on Broadband Wireless Access
