21 March 2013

To: Nan Chen, President, MEF
Kevin Vachon, Chief Operating Officer, Metro Ethernet Forum

cc: Mike Bencheck, MEF TC Co-Chair
Raghu Ranganathan, MEF TC Co-Chair
Paul Nikolich, Chair, IEEE 802 Executive Committee

Subj: Response to MEF Statement of 2013-01-31

The IEEE 802.16 Working Group (WG) on Broadband Wireless Access acknowledges with appreciation your informative statement of 31 January 2013 ([IEEE 802.16-13-0042-00-WGLS](http://www.ieee.org/802.16-13-0042-00-WGLS)). We found it quite helpful. Currently, we are proceeding with consideration of both architectural models, guided by your views regarding the different deployment scenarios.

You are welcome to follow the progress of our work through the web site <<http://wirelessman.org/scb>> and document repository <<http://docii-16r.wirelessman.org>> of our Project P802.16r on Small Cell Backhaul.

As our specifications become more mature, we may return to you for further review and hope for a continuation of our beneficial interactions.

Sincerely,

Roger B. Marks
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
